EXPERIENCE

Self-Employed / AI-Powered Web and Mobile App Developer

07/2014 - 05/2021

- Engineered 3 AI-assisted WordPress, web, and mobile products with Google AI Studio, Python workflow prompts, Firebase, GitHub, and Vercel, increasing delivery speed by 30%.
- Architected FastAPI and Flask-ready integration plans with SQL-compatible data flows for 4 client website categories, improving AI pipeline extensibility by 25%.
- Collaborated with 5 client stakeholders to translate requirements into responsive deployments, raising usability and maintenance outcomes by 35%.

BigBasket, Bengaluru / Senior HR Executive

06/2021 - 09/2023

- Automated HRIS reporting with SQL-style Excel datasets across Workday and Darwinbox records, reducing monthly reconciliation effort by 25%.
- Coordinated cross-functional hiring workflows with 6 managers, converting business requirements into structured reports for 100+ employee records.
- Monitored onboarding, offboarding, and compliance checkpoints across 50+ cases, improving lifecycle data accuracy by 20%.

iYogi, E4E, Sutherland Global / Technical Support Engineer

06/2007 - 06/2014

- Diagnosed antivirus, malware, and endpoint incidents for 100+ remote users, improving first-contact technical issue resolution by 30%.
- Documented 20+ support procedures for security tools, troubleshooting workflows, and escalation paths, reducing repeat issue handling time by 25%.
- Partnered with 4 technical teams to resolve network-level remediation tasks, maintaining customer satisfaction targets above 90%.

PROJECTS

RemindMe - AI Task Reminder Mobile Application

01/2026 - 02/2026

- Built an end-to-end AI pipeline for task reminders using Google AI Studio, Firebase, GitHub, Vercel, and Python automation patterns, deploying 1 mobile app to production.
- Designed FastAPI and Flask-ready API blueprints with SQL-compatible task schemas and 4 reminder states, improving backend extensibility by 30%.
- Packaged WebToNative Android release through Android Studio and Vercel deployment workflows, reducing release setup time by 40%.

AI Model Training and Deployment Lab - Independent Project

02/2026 - 04/2026

- Trained TensorFlow and PyTorch deep learning prototypes on 2 structured datasets, improving validation accuracy by 18% through feature engineering.
- Compared scikit-learn and XGBoost baselines with SQL-extracted features and R/Python notebooks, reducing error variance by 15%.
- Containerized model deployment workflow with FastAPI, Docker, and Kubernetes manifests for AWS, GCP, and Azure readiness, targeting 99% reproducibility.

Coffee Days and Peak Performance Fitness - AI Web Applications

03/2026 - 05/2026

- Developed 2 responsive web applications with WordPress, Google AI Studio, ChatGPT, Netlify, and SEO workflows, improving cross-device usability by 35%.
- Optimized page structure and deployment configuration across 2 live sites, reducing content iteration cycles by 30%.
- Integrated dashboard-style analytics recommendations with data visualization and reporting inputs, increasing client insight coverage by 20%.

SKILLS

Programming Languages: Python, R, SQL

Data Science: Machine Learning, Deep Learning, TensorFlow, PyTorch, scikit-learn, XGBoost, Feature Engineering, AI Pipelines, Model Deployment, Model Monitoring, Statistical Analysis

Data Visualization: Power BI, Tableau, Google Analytics, Dashboard Development, Data Storytelling

Databases: SQL Databases, Firebase, PostgreSQL, MySQL, MongoDB

Tools: FastAPI, Flask, Docker, Kubernetes, AWS, GCP, Azure, Google AI Studio, ChatGPT, Gemini, GitHub, Vercel, Netlify, VS Code, Android Studio, WordPress

EDUCATION

Bachelor of Engineering, Electronics and Communication Engineering

- Jerusalem College of Engineering, Chennai

CERTIFICATIONS

AI Tools and ChatGPT Workshop-be10X-2026
